# New Features/Improvements

The following are new features, functionalities or enhancements in this version of IWeb.

Key	Summary	Affects Client	Description
	PAIS	All	Patient status will be maintained at provider-organization and geographic-jurisdiction levels to ensure there is always a party responsible for immunization of every individual. If a patient does not have an active status with any provider-organization within a geographic jurisdiction, then a public health authority is responsible for the individual's immunization.
	Separate Stock – Vaccination Lot Selection	All	<u>Separate Stock feature flag must be enabled to test this change.</u>  Ordering Intention is displayed on the Vaccination Lot Selection module.
	IN Immunization Signature Form	IN	Made changes to display Guardian 2 details on IN Immunization Signature Form.

# Fixed Bug List

The following table lists the detailed information about each of the bugs fixed in this version.

Key	Summary	Affects Client	Description & Impact
<a href="#">HDSD-1251</a>	Application Performance	All	AZ was reporting the Approve Orders page taking 20 minutes to load. Vaccine linking was modified for all, to improve the deduplication processing time and performance with the database.
<a href="#">HDSD-87</a> <a href="#">HDSD-505</a>	Patient Records	All	Previously, when an HL7 message was submitted with a nine-digit zip code the new address updated except for the county code and the county code from the previous message was used. Now, the county code is updated based on the nine-digit zip code. Also, a data fix was created that helps to fix existing patient records affected.
<a href="#">HDSD-528</a>	Special Considerations	All	Enabled the following Special Considerations so that users have the ability to record Evidence of Immunity for patients. Those with asterisks were not enabled for MS by request. <ul style="list-style-type: none"> <li>● Laboratory Evidence of Immunity for Measles</li> <li>● Laboratory Evidence of Immunity for Rubella</li> <li>● Laboratory Evidence of Immunity or confirmation of Hepatitis</li> </ul>

			<ul style="list-style-type: none"> <li>● A disease*</li> <li>● Laboratory Evidence of Immunity or confirmation of Hepatitis B disease*</li> <li>● Evidence of Immunity or confirmation of Varicella disease</li> <li>● Laboratory Evidence of Immunity for Mumps</li> <li>● Healthcare provider verified history of or diagnosis of Varicella</li> <li>● Healthcare provider verified history of or diagnosis of Herpes Zoster</li> </ul>
	Deduplication	All	Updated the deduplication process to accurately process records when multiple HL7 messages are submitted with passport or visa details for the same patient.
<a href="#">HDS-955</a>	Modify Order Sets	All	For vaccines with multiple products, it was not possible to select different branded products. Modify Order Sets are now able to be edited and saved as expected. This only applies to states that have Modify Order Sets enabled.
	Remote Registry	All	Fixed the below issues for Remote Registry: <ul style="list-style-type: none"> <li>* Fixed the issue displaying an incorrect error message as “Message Rejected” for the messages that are accepted.</li> <li>* Corrected the text description for response messages that were previously not displaying to appropriately display.</li> </ul>
<a href="#">HDS-1090</a>	End Session	All	A Stack Trace error is no longer displayed when selecting End Session on the Administration screen.
<a href="#">HDS-880</a>	Fund Type Split	All	Previously, multiples of the same VFC PINS displayed in Fund Type Split Report for different Facilities. Now, only one Facility VFC PIN is displayed.
<a href="#">HDS-1221</a>	Vaccination	All	When the property 'Save Vaccination Default Date for Session' is enabled, the default date on the Vaccination View/Add Screen was not being saved for the duration of the session. Now the date will be saved. This was a problem for users who were accustomed to having the default date save for the entire session and could result in erroneous dates added when the dates were not verified at the time of data entry.
<a href="#">HDS-600</a>	Receive Orders	All	Previously, orders with inactive NDC numbers couldn't be removed/archived from the Orders screen. Now, orders with inactive NDC numbers can be removed/archived from the Orders screen.
<a href="#">HDS-1052</a>	Serology	WY	The Serology Module is activated for WY.
<a href="#">HDS-1330</a>	Vaccination	All	All vaccination date boxes are now visible on Vaccination > View/Add page without having to scroll.
<a href="#">HDS-1382</a>	Reports	All	Previously, when selecting a single date range, reports were ignoring the date parameters and running for all. The following reports can now be run for a single date range. <ul style="list-style-type: none"> <li>● Patient Detail Report</li> <li>● Lot Number Summary Report</li> <li>● Monthly Inventory Reconciliation Audit Report</li> <li>● Vaccination Totals Report</li> </ul>

			<ul style="list-style-type: none"> <li>• Vaccine Administered</li> </ul>

# Product Documentation

Product documentation is located on the STC Documentation Portal:  
<https://documentation.stchome.com/>.

The following documents are available on the Documentation Portal for this release of IWeb:

- IWeb (v. July 2018) User Guide (no changes for this version)
- IWeb (v. March 2018) Quick Reference Guides (no changes for this version)

# Database Release Notes

The following briefly addresses changes in the database for users with read-only access:

- Code changes to add new match set 125(PASSPORT+DOB) in H33\_WEIGH, corresponding changes to evaluate and pass PASSPORT in H33\_REPLACE\_CHECK and H33\_FIND\_DUPLICATESUNO-1890 Addition of two new name fields and a flag to db tables to indicate data is from authoritative source in the database.
- Inclusion of the new name fields and authoritative flag (OFFICIAL\_PATIENT\_DATA) and logic in the patient stored procedures.
- New property and setting to prevent overwriting the name data, dob and QID from MOI by another organization.
- Add official patient data and patient master overwrite block logic to stored procedures.
- Added state jurisdictional status logic.
- Added county\_jurisdictional\_status.
- Fixed issue with Dedup Patients not processing records for when submitting passport or visa.
- Corrected code to populate COUNTY\_CODE correctly.
- Implement mapping table for observation codes.
- Migrate existing contraindications to map to vaccine family rather than vaccine code.
