New Features/Improvements

The following are new features, functionalities, or enhancements in this version of IWeb.

Key	Summary	Affects Client	Description
	iCAT	All	New Features of iCAT consists of the following: • New iCAT property has been implemented and can be turned on and off. • iCAT Permission is available for registry client, organization client, and facility client users only. • Employer option is displayed on *the Facility Maintenance* page. • Nursing Home was added to the Facility Type drop down list on *Facility Maintenance* page. • Employer field has been added to *Patient Demographics* page. • The occupation field has been added to the *Patient Demographics* page. • When the iCAT property is selected and the user has the iCAT permission, the new Assessment Patient Attributes section is displayed on the *Patient Demographics* page. • The Title of EMT and DDS are available in the Title drop-down list when configuring and updating a physician/vaccinator.
	IZ Gateway/Reporting	All	As part of the CDC COVID Reporting requirements the following were added: • Dose number was added to VXU and Query response. • Serology functionality was added for outbound VXUs. HL7 messages can be sent with CVX 998 to indicate no vaccination was administered. The administered date will be used as the serology reported date. OBX-3 will house the test code and OBX-5 will house the test result. • Added support for Ethnicity to PID-22 in outbound VXU and Query response. Supported codes are Hispanic or Latino, code 2135-2, and not Hispanic or Latino, code 2186-5.
HDSD-2834	Provider Registration and Pandemic Registration	All	New Features of Provider Registration and Pandemic Registration consists of the following: • On the Administration page, a user is able to define Organization Site Types by using the Define

Key	Summary	Affects Client	Description
			Organization Type page. The same applies for Facility Types with the Define Facility Type page. • On the *Pandemic Enrollment Approval* page, the user is able to add or updated the Additional Status field. • The ability to run the Provider Contact Report by VFC Status and the Additional Status field is available.
	Provider Contact Report	All	When the Provider Contact Report is run with the following Output fields selected, all available options for these fields will be listed on the report output. • Vaccine Coordinator • Back-up Vaccine Coordinator • Certifying Provider
	Provider Agreement	All	The Ultra Cold Storage checkbox has been added to the *Provider Agreement* page for Cold Storage units in VOMS 2. Additional updates for VOMS 1 are coming soon.
	VTrckS	All	The following have been added and are complaint with ExIS Specification Revision D06: • "MIX" ordering intention as a selection option. • Pandemic (PAN) funding source as selection option. These are optional settings for vaccines within the application, they are not automatically set.
	Unit of Use	All	Removed "Unit of Use" from the Lot Number fields in IWeb and VOMS 2.
	Immunization Certificate	Puerto Rico	Links for the Vaccine Certificate have been added within the Puerto Rico system (English and Spanish Version).

Fixed Bug List

The following table lists the detailed information about each of the bugs fixed in this version.

Key	Summary	Affects Client	Description & Impact
HDSD-2007 HDSD-2623 HDSD-2744	Mass Immunization	All	Previously, the City field was not auto-populating based on Zip Code. The issue is corrected, and City is auto

Key	Summary	Affects Client	Description & Impact
			populating as expected. This helps prevent misspelled or incorrect City field entries. Previously, personal user settings were not carried over to Mass Imms which caused issues with First Name/ Last Name order preference. Now the property to show Last Name and First Name in order works as expected. This allows for a better user experience. An issue was fixed that affected adding vaccinations in the Mass Imms module. Now Add vaccinations using the *Add Anonymous* link in the Left Menu will only display in states with the Opt-in option enabled.
	Patient Search/Add	All	Patient search/add is now more consistent. When a user has the *Suppress Demographics Address Check* permission, a patient can be added with an address or with just a phone number. When a patient is added with just a phone number the message "or phone number" has been removed from the warning message.
	Facility Maintenance Page	All	Previously when selecting the Employer check box on the *Facility Maintenance* page the Facility Type field was required. Now, after selecting the Employer check box, Facility Type is not displayed as a required field.
HDSD-2720	Historical Vaccinations	All	When a provider was previously adding historical vaccine information, fields that were not required were being marked as required. This limited the provider's ability to enter historical information. Now the user has the ability to save changes or make edits to a historical vaccination without entering provider, lot number, and manufacturer information.
HDSD-962	Issue Resolution	PHC Hub/All	Previously, when submitting a message with an invalid Guardian Address City an issue resolution (of either error, warning, or ignore was not produced). This problem was resolved, and an issue resolution is now produced for invalid Guardian Address City. This was impacting data quality for Onboarding.
HDSD-2728 HDSD-2780	Reports	All	Previously, when running the Patient Detail Report by Service and selecting a Funding Source, there was an application error. Now, the Patient Detail Report works correctly running by Service.

Key	Summary	Affects Client	Description & Impact
HDSD-925	NPI Number	IN	Previously, the Provider Agreement allowed for Duplicate NPIs. Now using validation, you can no longer duplicate NPIs, unless you disable the option.
HDSD-1752	Physician Add/Update	WA	An issue was corrected as previously a format check was incorrectly applied when adding a provider Medical License Number. This affected adding new physicians. Now the Medical License Number is formatted correctly and there is no error when adding new physicians.

Product Documentation

Product documentation is located on the STC Documentation Portal: https://documentation.stchome.com/.

The following documents are available on the Documentation Portal for this release of IWeb:

- IWeb (v. July 2018) User Guide (no changes for this version)
- IWeb (v. March 2018) Quick Reference Guides (no changes for this version)

Database Release Notes

The following briefly addresses changes in the database for users with read-only access:

- Code changes to add new match set 125(PASSPORT+DOB) in H33_WEIGH, corresponding changes to evaluate and pass PASSPORT in H33_REPLACE_CHECK and H33_FIND_DUPLICATES
- Added new occupation rows into h33_lookup table, removed occupation_codes from h33_lookup_type_edit_access table and set to inactive occupation_codes in h33_lookup_type table
- Added new ordering intention 'MIX' to lookup table
- Added 'PAN' to lookup and funding sources table
