# New Features/Improvements

The following are new features, functionalities, or enhancements in this version of IWeb.

Key	Summary	Affects Client	Description
			None for this release.

# Fixed Bug List

The following table lists the detailed information about each of the bugs fixed in this version.

Key	Summary	Affects Client	Description & Impact
<a href="#">HDSD-3234</a>	Receive Transfers	All	<p>The patch for IWeb fixes critical issues in IWeb 5.39.0 including:</p> <p>When receiving a transfer, the sending provider’s inventory was failing to deduct. Now, transfer amounts update correctly from the <i>Sending Organization/Facility</i> inventory.</p> <p>Previously when an error occurred during the <i>Receive Transfer</i> process and refreshing the page would resubmit the receive transfer request which could lead to duplicate data being added. This issue has now been resolved and the inventory should populate as expected.</p>
	PHC Hub	All	<p>Previously PHC Hub performance was slow. Now, there is improved DB Connection pool performance by removing unnecessary locks on methods that were used for freeing connections.</p> <p>Previously, SFTP was configured to add process only 3 to 12 files at a time. Changes were made so the SFTP file processing limit could be increased in order to increase the number of files that could be processed at the same time.</p>

# Product Documentation

Product documentation is located on the STC Documentation Portal: <https://documentation.stchome.com/>.

The following documents are available on the Documentation Portal for this release of IWeb:

- IWeb (v. July 2018) User Guide (no changes for this version)
- IWeb (v. March 2018) Quick Reference Guides (no changes for this version)

## Database Release Notes

The following briefly addresses changes in the database for users with read-only access:

- None for this release
