New Features/Improvements

The following are new features, functionalities, or enhancements in this version of IWeb.

Key	Summary	Affects Client	Description
HDS-3308	Properties	All	Added a new property 'Enable the expiration of Provider Enrollment' under <i>Administration > Properties > Registry Settings</i> . The enrollment agreements will never expire if the property is unchecked. If the property is checked the enrollment agreements will expire 2 years after the agreement submitted date.
HDS-3298	Scheduled Reports	All	Added new functionality where, when a <i>scheduled report</i> cannot be created due to an error, IWeb sends an error email instead of the success email. Note that, for an error, the email starts with "There was a problem with your scheduled report."

Fixed Bug List

The following table lists the detailed information about each of the bugs fixed in this version.

Key	Summary	Affects Client	Description & Impact
HDS-3515	Manual Deduplication	All	Fixed the issue where an Index Out Of Bounds Exception is displayed when <i>Manual Deduplication > Merge</i> is done with selecting the 'Newest First' radio button and when there is a record with multiple patient matches.
	HL7 Batches	All	Batches containing multiple HL7 messages no longer update <i>h33_data_flow_log</i> on behalf of all messages in the batch so far as each new message is committed to the database.
HDS-3197	Keycloak SSO	All	Previously, enabling Keycloak SSO stopped IWeb from assuming that UTF-8 is the character-encoding on incoming requests, as it had since v5.16.5. Now, patient names including ñ will save correctly using the Patient Demographics page regardless.
	Death Certificate Number	All	Added the Identifier Type: Death Certificate Number to <i>H33_Identifier_Lookup</i> table.
	Country List	All	Previously, Kosovo and Palestine were not option in the Country/Nationality list. Now, Kosovo and Palestine are included in the Country/Nationality list.
HDS-3550	Patient Search	All	Previously, when a user searched for a patient using the incorrect birthdate an error displayed. Now, <i>Patient Search</i> is working as intended.

Product Documentation

Product documentation is located on the STC Documentation Portal: <https://documentation.stchome.com/>.

The following documents are available on the Documentation Portal for this release of IWeb:

- IWeb (v. July 2018) User Guide (no changes for this version)
- IWeb (v. March 2018) Quick Reference Guides (no changes for this version)

Database Release Notes

The following briefly addresses changes in the database for users with read-only access:

- Added Death Certificate Number to h33_identifier_lookup
- Added additional country codes
