

Add Historical Vaccinations

These instructions detail how to add historical vaccinations, which are vaccinations documented as having been given at a different location. Note that users must have client (not view) access and be logged in under an organization and/or facility.

Add a Historical Vaccination

1. First, locate the patient: Click the **Patient > Search/Add** menu link.

2. Enter the patient search criteria and click **Search** (or press Enter). The search results display with sortable columns.
3. Locate the patient in the list and click on the row to select it.
4. Click the **Vaccinations > View/Add** menu link.

5. On the Vaccination View/Add page that opens, either locate the vaccine in the list or select it from the drop-down menu. In the first available date box corresponding to the vaccine, enter the date of the immunization and click the **Add Historicals** button.

The vaccine is documented as added by your organization as a historical, indicated by an **H** beside the date.

Edit a Historical Vaccination

1. On the Vaccination View/Add page, click the date of the vaccination.
2. On the Vaccination Detail page that opens, select the appropriate button:
 - **Edit Record** – Edit the existing record
 - **Delete Record** – Delete the existing record
 - **Add/Edit Adverse Reactions** – Add a new or editing an existing adverse reaction

3. Save the changes.
