

## AFIX Export to CDC Online Tool

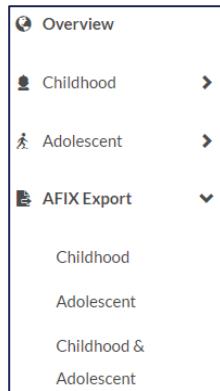

AFIX-level users can export a provider's childhood and adolescent coverage rates to an XML data file, then import (upload) that file to the CDC's AFIX Online Tool. The AFIX Export can generate XML files for the Childhood cohort (ages 24-35 months), the Adolescent cohort (ages 13-17 years), or both.

### Export to an XML Data File

- After logging in to SMaRT AFIX, enter a provider in the global Search Bar.

- Click the **AFIX Export** menu category, then click on the link for the type of data file you want to export: childhood coverage rates, adolescent coverage rates, or both.

- On the AFIX Export page that opens, review the information on the page and click the *I acknowledge that this page is complete, and all responses are final* option to select it. Next, click the **Export** icon (E) that appears below the acknowledgement option. Note that the Export icon does not become available until the acknowledgement option is selected.

Select the drop-down option of "Save As" to Save the file to an easy to your computer.

- Follow the prompts to save the XML file to the computer. Make note of the file location for later use.

Note that an exported AFIX data file is an XML file, which looks different from an exported PDF (or CSV) file:

```
<%xml version="1.0" encoding="UTF-8" standalone="true"?>
<AFIXExport xmlns="http://www.cdc.gov/afix/online-tool/1.1/exportSchema" xsi:schemaLocation="http://www.cdc.gov/afix/online-tool/1.1/exportSchema.xsd">
  - <Header>
    <AwardeeName>NORTH SOUND PEDIATRICS</AwardeeName>
    <ProviderPIN>186032</ProviderPIN>
    <CreateTS>2017-03-29T20:41:25.951Z</CreateTS>
    <AssessmentDate>2017-03-29</AssessmentDate>
    <childAssessments>234</childAssessments>
    <cohortVisitType>ChildOnly</cohortVisitType>
    <transactionId>979db334-2be1-4763-826d-291dbcf771e0</transactionId>
  - <ChildCohort>
```

### Import to the CDC's Online Tool

- Use your browser to open the CDC's AFIX online tool's login page:  
<https://csams.cdc.gov/PAPA/papaHome.aspx>
- Log in to the AFIX Site Visit Tool using the login credentials given to you.

**Log-In to the CDC's Online Tool with your Credentials**

- Click the General Site Visit Info tab and enter your provider information.

4. Click the Assessment Results tab to open that page.

Click the "General Site Visit Info" tab and enter your provider's information.

Select "Assessment Results"

5. Click the Import IIS Data button at the bottom of the page.

Click Import IIS Data Button

6. The tool prompts you to locate the XML file exported by the application. Locate and select the export file you saved on your computer and click **Open**.

Browse to Locate the XML file downloaded from SMArt AFIX, and select "Open".

7. If the import was successful, a verification message appears on the page with a green checkmark and the assessment results display in the first column. Manually enter the goal data in the second column fields, confirm the accuracy and completeness of the entire data on the page, and click **Save and Continue**.

Enter Goal Information for each vaccine. Vaccines Requiring goals are indicated with a red asterisks \*

Acknowledge that your results are complete and responses are final.

Imported Data

Save your Data

8. Enter the data on the remaining tabs per CDC and state policies and procedures.
9. Save the data and log out.
