

Childhood & Adolescent Master Rate Comparison Reports

The Master Rate Comparison report allows users to prioritize providers based on their coverage rate percentages, so that AFIX visits can be planned for providers that fall into the bottom quartile. The number of active patients associated with a specific provider is displayed so that the user can also prioritize by practice size.

Master Rate Reports

- **Childhood Master Rate Comparison Report (24-35 Months)** - The Childhood Master Rate Comparison Report displays providers in order of coverage rates and practice sizes as related to the Childhood cohort (ages 24-35 months).
- **Adolescent Master Rate Comparison Report (13-17 Years)** - The Adolescent Master Rate Comparison Report displays providers in order of coverage rates and practice sizes as related to the Adolescent cohort (ages 13-17 years).

The Childhood and Adolescent cohort age ranges are predetermined by the CDC and are not adjustable.

View a Master Rate Report

To create a report, select either the **Master Rate > Childhood** or the **Master Rate > Adolescent** menu link.

On the report, providers are listed with their VFC PIN and IIS ID. The percentage of up-to-date patients is displayed, along with a breakdown of the actual number of up-to-date patients as compared to the total number of patients in the age range.

NOTE: The displayed report is only a preview of the entire report. Export the report to view additional information such as county, as well as the full list of all facilities.

The Warning icon (⚠) is used on the Master Rate Comparison Report to indicate that a facility is in the bottom quartile, based on coverage rates for the relevant cohort.

PROVIDER - VFC PIN - IIS ID	% UTD for measure (# UTD / Adolescent Records)
KENT PHOENIX ACADEMY - 181476 - 9969	13% (1/8)
ADULT - PEDIATRIC MEDICINE/BURIEN - 181307 - 8035	8% (1/12)
