New Features/Improvements

The following are new features, functionalities or enhancements in this version of SMaRT AFIX.

Key	Summary	Description
	Custom Report – Adolescent Cohort	Previously 14-year-old patients were included in a custom report for 13-year-olds on the day of their 14th birthday. This has now been fixed. Also, the report header was modified to display "13 years".
	AFIX Export Tool	Due to the IQIP transition, AFIX reporting to the CDC AFIX Online Tool will no longer be necessary. As such, the functionality which formerly supported the upload for reporting has been removed.
	As of Date	The "As of Date" field on the Childhood and Adolescent Report will now display the time and time zone along with the date.

Fixed Bug List

The following table lists the detailed information about each of the bugs fixed in this version.

Key	Summary	Description & Impact
	Contraindication	Fixed the issue affecting the mapping of some of the contraindication codes for MMR & Varicella. These inconsistencies were resulting in false Missed Opportunities.
	Last Vaccination Date	Fixed the issue causing the last vaccination dates to remain retained after a record deletion, causing false MO results in those cases.
	Provider Group	Fixed the issue that prevented users from being able to search and/or add Provider Group/Provider Group Users.
	Coverage and Patient List Report	Fixed the issue causing some antigens to be excluded from the childhood and adolescent report header when exported. Without this fix the printed antigen list in Coverage Report would show UTD MENING instead of 1 MenACWY.

Product Documentation

Product documentation is located on the STC Documentation Portal:
<https://documentation.stchome.com/>.
