

Course Reports

After courses are created in STC|U, instructors can use course reports to track student activity, participation, and completion of courses.

Run a General Course Report

1. Log in to STC|U.
2. Under My Courses on the left, select the course for which you want to run a course report.
3. Click the gear button  and click **More...**
4. Under Course Administration, scroll down to the Reports section and click on one of the reports:
 - **Logs:** These are activity reports that can be run for individual users or for all users. You can also narrow the report down to a specific activity, action, education level, and/or day. The report can be downloaded in a text file (comma-separated or tab-separated), Excel spreadsheet, OpenDocument spreadsheet, or XHTML file.
 - **LiveLogs:** This documents who is using the STC|U site in real-time. It also gives information regarding what was accessed, which component, the event name, origin, and IP address, and a description of what they did. You can also pause live updates by clicking the **Pause live updates** button.
 - **Activity Reports:** These reports document the activity within STC|U. They list each activity, how many views it had, and the date and time stamp for the last time the activity was accessed.
 - **Course Participation:** This tracks course participation for a specific course, for all enrolled students. It can be narrowed down by a specific number of days, which type of user, and specific actions taken.
 - **Activity Completion:** This report displays the activities that have been completed by enrolled students. The report can be downloaded as an Excel spreadsheet.

SCORM Course Activity Reports

If your course includes a SCORM activity, additional reports can be found within the activity.

1. From the course page, click on the SCORM activity title.
2. Click on the Reports tab on the right.

3. Select the report type:

- **Basic Report:** Lists the student's information and time stamp from when they started and last accessed the activity.

- **Graph Report:** Displays the student grades (of students who have completed the activity) in graph form.
- **Interactions Report:** Displays a student's information, the answers selected by the student, any text entered by the student during the activity, and the score received.
- **Objectives Report:** Lists the students and displays their completion status for the activity.
