

Exporting SCORM Packages

If a software to create interactive course content is used, it will need to be published as a SCORM package to be utilized in the STC|U site. The following instructions have settings in Articulate and Adobe Captivate that will make the SCORM package compatible with STC|U.

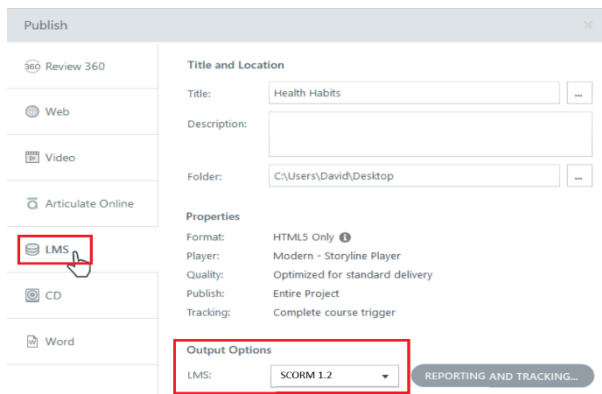

Export a SCORM package from Articulate

In Articulate Storyline:

1. Click **Publish**

2. Click **LMS**
3. Under Output options, select **SCORM 1.2** for compatibility with STC|U

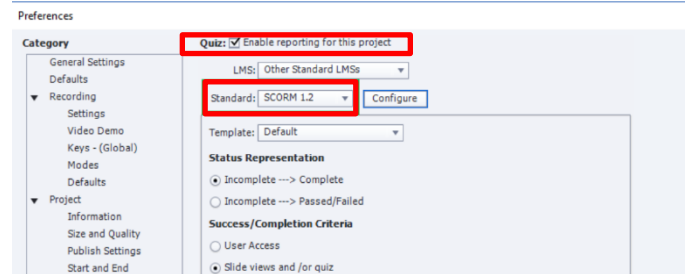

4. Click **Publish**
5. The window "Congratulations, what do you want to do now?" appears
6. Click **Window** → **Zip file** → **save as .zip**

Setting up a SCORM package in Adobe Captivate

In Adobe Captivate:

1. Click **File > Project Info**
2. A **Preferences** window will open
3. Click **Quiz > Reporting > Check the enable reporting for this project**
4. In the **Standard** dropdown, choose **SCORM 1.2** for compatibility with STC|U

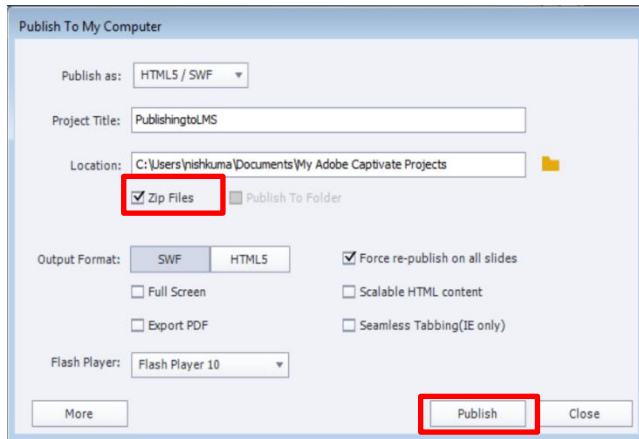

5. Click the **Configure** button.
6. In the Course box, fill in the **Identifier**
7. Add a **Title** and **Description**
8. In the SCO box, add the **Identifier** which will become the SCO ID.
 - a. Most put the letters SCO followed by an underscore and a three or four-digit number (e.g. SCO_001)
9. Add the SCO **Title**.
10. Click **OK**.

Export a SCORM package in Adobe Captivate

1. Select **File > Publish**
2. Fill in the **Project Title**

3. Designate the **Location** for the published project. This should not be the same location as the authoring files.
4. Make sure that **Zip File** is selected.

5. Click **Publish**.
6. When the packaging completes, click **OK** to clear the message box.
7. Click **Close** to clear the dialog box
