# Wastage Graph Display

**Description:** The wastage graph is not displaying on the VOMS landing page.

**Version Affected:** VOMS v2.17.5

**Who Identified the Issue:** STC

**Priority:** Medium

**Date:** 5/26/17

**Steps to Test:**

1. Login into VOMS
2. Search for an org/fac
3. Notice the Wastage Graph is not displaying

**Expected Results:** The Wastage Graph will display data based on the org/fac selected.

**Actual Results:** The Wastage Graph is sometimes not displaying data.

**Note:** This issue is not happening each time an org/fac is selected.

# Facility Statistics Not Calculating for State Approvers

**Description:** The Facility Statistics section data is not adding together state accumulative totals.

**Version Affected:** VOMS v2.17.5

**Who Identified the Issue:** STC

**Priority:** Medium

**Date:** 5/15/17

**Steps to Test:**

1. Login into VOMS
2. Select state approver org
3. Notice the Facility Statistics section is not showing data for the whole state

**Expected Results:** The Facility Statistics section should be adding all state statistics data.

**Actual Results:** The Facility Statistics section is not adding all state statistics data.

# CLD Patient Pop-up is Not Displaying All Information

**Description:** When the Lot Number, Manufacturer and Funding Source columns are left blank on the Correct Decrementing page the patient pop-up is not displaying all patient information.

**Version Affected:** VOMS v2.17.5

**Who Identified the Issue:** STC

**Priority:** Medium

**Date:** 05/26/17

## **Steps to Test:**

1. Login into VOMS as a RC or FC user
2. Select an org/fac
3. Go to Inventory > Correct decrementing
4. Click on Search
5. Click on 'View' in Patient ID column for any records with any of the columns (Lot Number, Manufacturer and Funding Source) blank
6. Notice all Patient information is not displayed in the Patient Id pop-up

**Expected Results:** The Patient ID pop-up should display all patient information.

**Actual Results:** The Patient ID pop-up is not displaying all patient information.

# Not All Vaccine Information is Being Updated in IWeb after a Lot is Decrementing

**Description:** The Funding Source and Manufacturer are not being updated in IWeb after the lot is decremented during the CLD process.

**Version Affected:** VOMS v2.17.5

**Who Identified the Issue:** STC

**Priority:** Medium

**Date:** 05/25/16

## Steps to Test:

1. Login into VOMS
2. Select an org/fac
3. Go to Inventory > Correct decrementing
4. Click on Search
5. Process one of the records by selecting the correct lot for the record with a blank funding source
6. Notice the lot is decremented correctly but the funding source is not updated in IWeb.

**Expected Results:** The funding source is updated in the IWeb patient vaccination record after the lot is decremented.

**Actual Results:** The funding source is not being updated in the IWeb patient vaccination record after the lot is decremented.

**Note:** The same issue was found when the manufacturer column is blank.

# 'Select Approved' Button on Approve Orders Page is Not Working

**Description:** On the Approve Order page the 'Select Approved' button is not selecting all the orders with the status of 'Approved'.

**Version Affected:** VOMS v2.17.5

**Who Identified the Issue:** STC

**Priority:** Medium

**Date:** 05/15/17

## **Steps to Test:**

1. Login into VOMS
2. Search for an org/fac
3. Go to Approvals & Management > Approve Orders
4. Click on 'Select Approved' button under 'Orders for Review and Approval' table
5. Notice the orders that are already approved (blue check boxes) are not selected/checked

**Expected Results:** Clicking the 'Select Approved' button should select all orders in the 'Approved' status.

**Actual Results:** Clicking the 'Select Approved' button does not select all orders in the 'Approved' status.

# Lot Numbers are Not Decrementated when the Lot Number Column is Blank During CLD

**Description:** When the Lot Number column is empty during the CLD process the Lot is not decremented.

**Version Affected:** VOMS v2.17.5

**Who Identified the Issue:** STC

**Priority:** Medium

**Date:** 05/23/17

## **Steps to Test:**

1. Login into VOMS
2. Search for an org/fac
3. Go to Inventory > Correct decrementing
4. Click on Search
5. Click on View lots for the record for a Lot Number column that is blank
6. Select a lot and click Save
7. Notice the line item is still on the page

**Expected Results:** The Lot Number should decrement regardless of which fields are left blank.

**Actual Results:** The Lot Number is not decrementing if the Lot Number column is blank.

**Note:** The page may take longer than average to load.

# Restrict from Ordering Issue

**Description:** Selecting 'Restrict From Ordering' for vaccines on the Define Order Set page are not saving.

**Version Affected:** VOMS v2.17.5

**Who Identified the Issue:** STC

**Priority:** Medium

**Date:** 03/16/17

## Steps to Test:

1. Login into VOMS
2. Select Admin & Settings > Define Order Set
3. Create a new order set or edit an existing
4. Click 'Restrict From Ordering' on one of the vaccines > click Save
5. Confirm the save
6. Notice when the page loads the vaccine that was restricted is no longer checked as restricted

**Expected Results:** Vaccines marked with 'Restrict From Ordering' should save upon clicking save on the Define Order Set page.

**Actual Results:** Vaccines marked with 'Restrict From Ordering' are not saving on the Define Order Set page.

**Note:** Selecting 'Restrict From Ordering' from the Vaccine Settings page will restrict the vaccine from being ordering.
