

Properties and Settings

The VOMS application has a number of settings that users with the Vaccine Ordering Management permission can configure. These settings are available from the **Admin & Settings** menu link.

1. To configure System settings, click the **Admin & Settings** menu link and then **Properties** (under System Settings).
2. There are five tab sections on the Properties page:

- **General**-includes general settings, cold storage settings, and import settings.

General Settings

Days Between Required Physical Inventory (Reconciliation)

Do Not Allow Facility Client to Add New Inventory Using "Lot Number + Search All"
