New Features/Improvements

The following are new features, functionalities, or enhancements in this version of iQ.

Key	Summary	Description
HDSD-692	Onboarding Clean Up	There are multiple text updates to the Onboarding Panel that have been added to provide appropriate description.

Fixed Bug List

The following table lists the detailed information about each of the bugs fixed in this version.

Key	Summary	Description & Impact
HDSD-673	Email Template Not Saving	Email Templates are now saved and displayed under <i>Saved Email Template</i> when a user clicks <i>Save</i> .
HDSD-685	Facility level Data	Organization level users are now able to drill down see the affiliated facilities data across data summary, DQA, trends, and within the dashboard view.
HDSD-687	Filter Functionality in audit log	The transaction log viewer columns are now all able to be sorted. This matches the same functionality as the rest of iQ.
HDSD-693	Contact Group Clearing	The contact list will no longer carry-over contacts from pervious tasks. A user will be able to continue seamlessly adding contact groups without previously added contacts being added to new groups.
HDSD-695	Global Contacts Edit	Previously, when a user would begin editing and later cancel, the previous global contact details would clear out. Now if you cancel the edit on global contacts it will retain the original value.
HDSD-691 HDSD-708	Misspelling of "Allow" "County/Parish"	In order to better represent the application and the state that promotes the application, updates were made to fix misspelling. The word "Allow" was misspelled in a statement for Activate/Deactivate Waitlist and Ranking Section. The word "County" was misspelled on the Provider Profile.
HDSD-725 HDSD-726	Email Address Format	Previously, the system would auto populate a comma between multiple email address and Outlook needs a semi-colon. This would cause a failure to send email using Outlook when more than one email addresses were listed. Email addresses are now separated by a Semi-colon.
	Provider Profile Error	Previously when opening the Provider Profile page for a provider who was not yet added to the onboarding list, the application would stop working until you signed-out and then logged back in. This issue has now been resolved.
	Discrepancy in required questions between Interface versions	Previously both provider required questions and state required questions were less visible for state users. After this fix different colored stars were added so that questions are easily identifiable for the state user.

Key	Summary	Description & Impact
	Invalid Phone Number, Email or Zip code	Previously a user was able to submit the interface form with an invalid phone number, email address, or zip code. Now the form requires valid the phone numbers, email addresses, and zip codes.
	Exporting Error	Exporting a submitted interface form previously caused the application to unexpectedly crash. After the fix, the export function will allow the user to export the report without a problem.
	Submitted Form Export	When a user previously exported a submitted form, data was pulled from more than one tab. Now the data will only be pulled from the relevant tab being populated by the user.
	Email Template Formatting	Previously the email template was not formatted when a user would also used Outlook. Now when a user sends the template, the formatting will match what is in the application.
	Global Search Number Copy/Paste	If a user previous copied and pasted numbers into the <i>Global Search</i> , the relevant results would not populate. Now if a user copies and pastes numbers into the Global Search the relevant results will populate.
	Provider Search by Facility	Previously users were unable to search by facility name. This has been fixed to allow users to search by Facility name as well as Organization name.
	iQ Form Scoring	Blank answer selections (Radio Buttons, Check Boxes, Drop-down Menu) used to have an attached score. After this fix there will not be any score attached for blank answer options.
	Forms Blank Question	Previously, if a required question with any text label was erroneously added by a state user, the users were not able to submit the form. After the fix if the question/answer is blank then that question won't be displayed.

Known Issues

If there is a partially rejected message, this message will be counted under both successful messages and failed messages.

The organization's name is missing from the DQA export/print functionality.
Temporary solution: Select a facility in the global search bar > Run the export > Then remove the facility and export again.

The Following Issue Resolutions are missing from iQ.
Patient Nationality

Patient Birth Country

When a registry-client edits and saves the form, the date under the draft does not change; only the form version changes. The date will get updated after changes are completed and the form is moved to the active forms section.

Alerts Email is currently hidden until the Alerting functionality has been fixed.
