New Features/Improvements

The following are new features, functionalities, or enhancements in this version of iQ.

Key	Summary	Description
	Font Style	The font style of the application was updated to match the DQA font style.
	Navigation	Clicking on the “i” icon will take the user to STC documentation portal.
	Notes	The following improvements were made related to Notes: <ul style="list-style-type: none">• Notes are now sorted by date created with latest on top.• Notes can now have a maximum of 5000 characters.• Logs for notes now display the first few words of each log entry.• Logs will not be created now if there is no change in the note.
	Onboarding Panel	The following improvements were made related to the Onboarding Panel: <ul style="list-style-type: none">• Pagination was added for notes in the onboarding panel. If there are 6 or more notes for one provider’s notes, another page will be added. Each page will hold 5 notes.• Minor changes were made on the main tab of the onboarding panel to match the new design. After this change, if a task is complete then it cannot be edited.• A checkbox to filter completed tasks was removed from the main page on onboarding panel.• The color of pagination was changed to white.• Email code was removed for new/updated tasks.
	Tasks	The following improvements were made related to Tasks: <ul style="list-style-type: none">• A <i>Task</i> page was added for State users, so that State users can review all tasks.• Previously, only actions were recorded in the log, not the subject of the task. Now State users can find more details in the logs like the name of the task and AM/PM for the time of actions taken.• The task table was improved. State users can review all tasks on one page and sort/filter, as necessary.

Fixed Bug List

The following table lists the detailed information about each of the bugs fixed in this version.

Key	Summary	Description & Impact
	Created Date	The <i>Created Date</i> field now displays AM/PM along with date and time.
	Email Integration	An email template and SendGrid connection was added to the task. Due to this change, tasks can be emailed by clicking email icon.
	Priority Field	Previously when a user attempted to change the <i>Priority</i> field, the log would generate even when the user did not change the priority action. Now, the log will be generated only when there is an actual change in the priority.
	Tasks	When any task is marked as completed, the following task will no longer retain the checkmark. Previously it was not clear whether the tasks were created/updated for AM or PM. Now the users can see AM/PM along with the date and time of task.
HDS-684	Validation	Previously validation was not working as expected for contact creation including the position field. Validation was fixed so now if the user does not enter information in the position field it will give an error upon creation.

Known Issues

Contact Groups under Admin menu – Navigating to next page may clear the data.

If there is a partially rejected message, this message will be counted under both successful messages and failed messages.

The organization's name is missing from the DQA export/print functionality.
Temporary solution: Select a facility in the global search bar > Run the export > Then remove the facility and export again.

The Following Issue Resolutions are missing from iQ:

- Patient Nationality
- Patient Birth Country

When a registry-client edits and saves the form, the date under the draft does not change; only the form version changes. The date will get updated after changes are completed and the form is moved to the active forms section.

Alerts:

Email is currently hidden until the Alerting functionality is fixed.

Product Documentation

Product documentation is located on the STC Documentation Portal:
<https://documentation.stchome.com/>.

The following documents are available for this version of iQ:

STC|iQ (v. April 2018) User Guide

STC|iQ (v. April 2018) Quick Reference Guides
